WORLDWIDE RECRUITMENT UPDATE

- ◆ China is our top recruiter with 40 patients since starting in March 2012
- ◆ Chile is doing well with 8 patients from one hospital
- ◆ Singapore recruited 6 patients within the short space of 2 months
- ◆ The United Kingdom (UK) joined in June 2012 and has recruited 4 cases. Congratulations to University Hospital of North Staffordshire for randomising the first UK patient into ENCHANTED.
- ◆ As of 27 June 2012 our total worldwide recruitment status is 59 patients.

EUROPEAN STROKE CONFERENCE

At the European Stroke Conference in Lisbon, Portugal on Thursday 24th of May 2012, the ENCHANTED Investigator meeting created great interest with many potential European investigators. The expression of interest received from potential sites will see countries in Europe participating in ENCHANTED in the near future

Clinical Neuroscience

ENCHANTED Monitor Tips:

Just a reminder that for all Patients that are randomised in to Treatment arm [A], please ensure the vial number is entered onto the CRF and the package is stored with Patient File for review by monitor. To prevent mix ups please attach ENCHANTED label. Please request from your RCC if you have not received any.

Scoring sheets are provided in the patient file for all Neurological/ Functional & Quality of Life assessments, they are also downloadable off the ENCHANTED database. Please record all assessments on these scoring sheets as they will form part of the patients source documents.

All laboratory results/reports need to be assessed and signed and dated by a delegated ENCHANTED Investigator. If a result is outside of the normal range, the Investigator needs to document whether the result is clinically significant (CS) or not clinically significant (NCS).
