Project Managers

Xiaoying Chen and Joyce Lim

ENCHANTED is an investigator trial involving over 100+ centre globally. Two Project Managers (PM) were appointed in December 2011.

Xiaoying Chen has been with The George Institute China for 4 years. She has significant experience in clinical research and site management including being the Project Manger for INTERACT2 in China. She will be the global manager overseeing the project full time. She will be the Manger responsible for China, Taiwan, Korea, United Kingdom and Europe.

Joyce Lim has been with The George Institute for 3 years managing the AuSCR and Fabry Projects . She has significant experience in health and community service management. Joyce will add the ENCHANTED project to her current portfolio part-time and will be responsible for Australia, Singapore, Vietnam, India, Sri Lanka and South America.

Together the two managers with their extensive research and health experience creates a strong partnership for the management of the ENCHANTED project.
